

REPORT of the meeting school-families.

Date: December, the 14th of 2017.

Place: L'Esperança school. Quito street number 25-37. 08030 Barcelone.

17:30h.

We meet five muslim families, all the people were females, and four teachers. Four families who receive services from Trinirove and L'Esperança.

All of us were seating in a round.

I explained what ATOMS&CO project is.

We asked the families for three questions:

1.- what do you think about the connection/communication path/ relationship/ dialogue (in your experience) between school and families?

2.- what do you think it could be done to make this connection much more effective/good/helpful for the students?

3.- How do you think it could be done?

The method we follow was to bring the families some coloured stickers where they should wright their answers. As two persons doesn't know how to wright in Spanish, two teachers helped them.

The answers to the first question were:

"My children were in another school before, so now I can see that in this school (L'Esperança) they feel as if they are in their second home"

"There is a good communication between families and school, it's really a family relationship"

"We feel as a member of the school family, there is a proper communication"

"My sons feels, with teachers and students, as a family"

"In my opinion, and from my experience, I think there is a good communication because there are different ways to do it: direct way with personal interview, writing communication (Agenda), and online communication with the digital platform of the school (Clickedu)"

The answers to the second question were:

“I know everything that happens at school and between the school and I myself we find the solution”

“We talk with our children about the topics we have talked with teachers”

“We reflect, at home, with our children about the topics we have talked with teachers”

“I think there always will be a tracking of the course and the students, and it should be a conversation time to achieve common strategies between family and school”

“When I talk with my children I always says them:” you should act as your teachers””.

The answers to the third question were:

“I would like to have a working session to know how the digital platform of the school (Clickedu) works”

“Meetings, with families and school, to talk about pedagogical matters and it will be good to do this periodically”

“I think we must take advantage from news technologies (WhatsApp, internet,...) and also it should be conferences with professionals and specialists in the different educational stages”

“”It will be good to have a monthly interview with the teachers”

“I’d like to have more interviews with the teacher”

Because of we were just five families, we didn’t make a final speech, we were speaking with families all the meeting and helping them to think about the questions and write their proposals.

We talk about to increase the number of families involved in the project, but not just in the project, even in the life of the school. So, we will try to do one meeting monthly to share ideas and to achieve some tools, specially about the work in emotions.

We finished the meeting at 18:30h

Now, here you have some pictures of the meeting
