

The UNIBO Team Report

19/10/2017 Bologna

Focus-group with teachers, social workers, educators, local actors

On 10/10/2017 the Unibo team organized a focus group with teachers, social workers, educators, local actors to analyze representations, experiences, practices and critical aspects of the school-family relationship. The focus group was an opportunity to promote the exchange of knowledge and experience between members of the local network, to stimulate a critical reflection on the engagement of families in the school life, to reflect on some particular practices that could “to make system”.

10/10/2017

Focus group with parents

On 10/10/2017 the Unibo team, with the support of the local network of Bologna, organized a focus group with the families. The aim was to collect the school experiences of families with different socio-economic profiles and with children of different ages. The exchange of views was also useful for the development of the questionnaire that will be distributed to families by all project partners.

Families were very interested in taking part in the discussion and in the next actions of the project. They especially appreciated the attention given to their point of view on the school organizations and on decision-making processes in different education institutions.
